

TriQ without Lies (TwoL)

Instructions:

This test is not a pure intelligence test. However, a high score will most probably correlate strongly with a high IQ. Some items require convergent thinking, while other require divergent. Sometimes a combination is necessary to solve an item. A spatial item may show up among the numerical ones, and a numerical one among the spatial or verbal. It is up to you to find out. The test is untimed, and all aids are allowed with the exception of discussion with others. It is possible to hand in only one of the parts: numbers, words, or figures, and have it scored separately. A completely correct answer yields one point, everything else zero points. Items are **not** arranged in order of difficulty. Please send your answers to:

submission@iq300.se

Since this test is scored for **free** on my spare time, I require three things from you:

1. Do **not** discuss solutions with others: prior, during, or after the test.
2. Do **not** publish solutions or answers, anywhere, anytime.
3. Fill in **all** information in the table below when submitting.

Good luck!

Name?										
Age?										
Nationality?										
Gender?										
Publish score online?	Yes	<input type="checkbox"/>	Initials	<input type="checkbox"/>	Anonymous	<input type="checkbox"/>	No	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Estimated correct answers?	Numbers		/25	Words		/40	Figures		/20
